

JOHN DEERE REMAN

Basic Engines

The John Deere Reman lines of basic engines are designed to meet customer demands to minimize downtime and provide the customer a low-cost repair alternative. All John Deere Reman basic engines are built and tested to provide you with the same John Deere quality products you are accustomed to.

Key benefits of John Deere remanufactured basic engines:

- Reduce customer downtime up to 50-percent or more when compared to an overhaul.
- Provides a cost competitive product compared with outside supplier rebuilding options or dealer overhauls.
- Provides known repair costs up front.
- Provides a two-year, 2000-hour parts, labor, and consequential damage warranty if dealer installed in Ag applications. One year unlimited hours in Construction & Forestry applications.
- Provides a product remanufactured to stringent John Deere quality specification using only genuine OEM parts and approved remanufacturing processes.
- Remanufactured not rebuilt.
- Basic engine configuration:
 - Cylinder block and head, including internal components.
 - Front plate, front cover, front and rear seals.
 - Water pump, valve cover, oil cooler, oil filter housing, and filter.
 - Engine is painted, and shipped with a complete gasket kit.

When reduced downtime, higher quality, known repair costs, and company product support are important to you, look to John Deere Reman products for all your engine service solutions.
