

## Power Up Your Future

FlintCo, in partnership with John Deere, offers sponsorships at Southwest Georgia Technical College in Thomasville, Georgia, for the Agricultural Technology Program and the Construction & Forestry Technology program. Graduates will receive an Associate of Applied Technology Degree and are initially employed as technicians with future opportunities for career advancement.

### CONSTRUCTION & FORESTRY TECHNOLOGY PROGRAM

#### Program Description

Construction and Forestry Technology is an Associate Degree Program that consists of 21 months of combined classroom and cooperative education training. The classroom and related instruction was designed jointly with industry to provide students with the theoretical, technical, and general academic knowledge needed to succeed in the construction and forestry equipment servicing industry.

The cooperative work phase of the program requires students to be employed full-time in one of our fifteen John Deere dealership locations to receive on-the-job experience. FlintCo, through its Flint Equipment Company division, will provide the necessary tools and uniforms needed for the cooperative training. We will also pay for one-half of your tuition and books each quarter. After graduation, if you elect to become a full-time employee, FlintCo will reimburse you on a quarterly basis for your half of the tuition expense. In addition, after you complete one year of full-time service at one of our John Deere dealerships, we will allow you to keep the tools you used during your cooperative training.

Our FlintCo Family of Companies has a track record of promoting from within. Technicians within our organization have been promoted to such positions as Service Writers, Parts and Service Managers, Customer Service Advisors and Sales Representatives. Many former technicians have been employed with us for over twenty-five years and have advanced their careers to middle and senior-level management.

## AGRICULTURAL TECHNOLOGY PROGRAM

### Program Description

Agricultural Technology is an Associate Degree Program that consists of 21 months of combined classroom and cooperative education training. The classroom and related instruction was designed jointly with industry to provide the student with theoretical, technical, and general academic knowledge needed to succeed in the agricultural equipment servicing industry.

The cooperative work phase of the program requires students to be employed full-time in one of our fifteen John Deere dealership locations to receive on-the-job experience. FlintCo, through its Albany Tractor Company division, will provide you with the Agricultural Technology uniforms required for school. To assist with the cost of tuition, fees and books, scholarships up to \$500.00 per quarter are available to agricultural technology students through the John Deere Foundation. Scholarship applications and procedures can be obtained from the financial aid office of Southwest Georgia Technical College in Thomasville at 229-225-4096, or visit their website at [www.swgtc.net](http://www.swgtc.net).
